THINKING ABOUT SELLING TIMBER?

Here are a few pointers to help you:

1. Know the volume and the value of what you are selling.
2. Request bids from potential buyers.
3. Ask loggers and other potential contractors for references.
4. Have a Timber Sale Contract containing at least the following:
 - a. Volume to be sold by species.
 - b. Sale price by species and escalation clause.
 - c. Utilization specifications (e.g., cut all marked trees to a five-inch top and a minimum of eight feet in length).
 - d. Beginning and ending dates.
 - e. Method of scale or basis of measurement.
 - f. Method of payment.
 - g. Cash performance bond equal to a fixed portion of the sale.
 - h. Slash disposal requirements.
 - i. Road maintenance during and at end of sale.
 - j. Establishment of arbitration board, if necessary.
 - k. Require contractor to have necessary insurance.
 - l. Other special requirements, such as restricting logging in calving areas.
5. Oversee and administer your sale to make sure terms of the contract are being met.
6. Seek professional advice on using federal tax treatments for timber income to reduce tax liabilities.
7. Consider the use of a professional consultant to do all of the above for you if you do not have the time to do so yourself.

OBTAINING PRIVATE FORESTRY ASSISTANCE

Private forestry assistance in Montana comes in several forms. The Extension Forestry Office of the Montana Extension Service is responsible for keeping the general public informed on forestry issues and for developing publications and workshops to educate forest landowners. Information and education materials are distributed with the assistance of county agents. The Forestry Assistance Program of the Montana Department of Natural Resources & Conservation cooperates in landowner educational efforts and also offers limited one-on-one assistance to forest landowners harvesting

timber via service foresters located in the unit offices throughout the State. At the present time one-on-one assistance is available only in the counties west of the Continental Divide. The professional consultant forester is the final spoke in the wheel of private forestry assistance. It is the policy of the Montana Department of Natural Resources & Conservation, Forestry Division, to refer the private landowner to a consulting forester when:

1. The job to be done involves sale of wood products, appraisals, surveying, contract negotiations and disputes.
2. The job is too large for the service forester to accomplish in the one day per timber sale allotted for such assignments.
3. The landowner or contractor is capable of paying the fees of a consulting forester, and a consultant is available to do the job.

SELECTING YOUR CONSULTANT

A consultant's business is based on satisfied clients. The person or company you hire should represent and serve your best interests in all matters concerning your timberlands. A consultant's fees may be based on the acreage of timberland involved, a percentage of the revenues from sales, dollars per thousand board foot product, amount of time required to perform the job, or in the case of tree planting, dollars per 1,000 seedlings planted. Cost should be one consideration in choosing a consultant, but a forester's experience, performance record and understanding of your objectives are equally important. There is no single best way to manage forestland. Goals and objectives of landowners vary widely. Choose a consultant who understands your needs and with whom you feel comfortable. Determine a consultant's qualifications by requesting information from the consultant and references from several of the consultant's clients. Compare this information and estimates of costs from several consultants before choosing the one you would like to work with. The knowledge and experience of consulting foresters vary widely.

As in any business arrangement, be aware of competing loyalties. Some foresters may be employed as timber buyers for forest products companies; others are associated with such companies or have a potential conflict of interest involving other clients. The consultant is ethically bound to inform you of any possible conflicts of interest or even an appearance of such conflicts. There are no legal standards governing consultants in Montana.

Once you have selected a consultant, sign an agreement or contract. This should include a list of services to be performed and how and who will perform them. For example, if boundaries are to be marked, who will search the records for property descriptions? Who will obtain the necessary permits such as water quality permits or Forest Fire Hazard Reduction Agreements? If timber is to be sold, will it be by competitive bid, negotiated bid, or contract logging? How often will the consultant check during harvesting to assure that the job is done correctly? How will the volume of timber sold be figured out, and by whom? If a fuelwood sale is a possibility during or after the harvest, who will receive the proceeds?

National and regional shortages of energy and high quality timber are rapidly improving the economics of growing wood. Landowners who commit themselves to sound land management practices will reap both short- and long-term financial benefits. A carefully chosen professional forestry consultant can help you achieve the full potential of your forestry investment.

ASSOCIATION OF CONSULTING FORESTERS

The Association of Consulting Foresters of America, Inc. (ACF) was founded in 1948 to advance the professionalism, ethics, and interests of professional foresters whose primary work was consulting to the public. The ACF is the only national association for consulting foresters.

ACF members operate in corporations, partnerships, and sole proprietorships with 1 to 100+ employees. Many are general foresters, while others have professional specialties within forestry.

The ACF is active in the areas of most interest to consulting foresters and their clients. These areas include but are not limited to:

- Setting the standards for the consulting forestry profession.
- Educating and assisting landowners in good forest stewardship of their lands.
- Tracking legislation directly impacting private forestry, including taxation, private property rights, wetlands, clean water issues, endangered species and more.
- Educating and increasing the awareness of the public, legislators and others on issues sensitive to private landowners and their ability to practice good forest management.
- Cooperating and working with federal and state agencies to protect private property rights.

Worldwide

EXPERIENCE

22 years consulting experience. Since 1979, we have provided services to over 100 clients in nine states, as well as in Latin America, Central Africa, and Eastern Europe. Our mission is to help clients evaluate, develop and manage forest-based enterprises. We have extensive experience in timber cruising and appraisal, feasibility analysis, and business plan preparation. We also provide expertise in timber procurement, timber harvesting management, and forest products marketing. We are available for jobs of any size, any time, anywhere in the world. Projects have included timber inventories of up to 100,000 acres and project appraisals up to \$100 million. Our resource analyses and feasibility studies have resulted in the sale, purchase, and construction of several sawmills. Four-year natural resources degree.

Member of Society of American Foresters and Montana Logging Association. Charles H. Hawkins III has degrees in Business and Forestry, as well as broad practical experience in forestry, logging, sawmilling, marketing, and general business management.

SERVICES PROVIDED

Absentee Owner Representation; Appraisals; Cruising and Marking; Forest Management and Silviculture; Forest Resource Potential Analysis; Industrial Developments, Milling and Layout Design; Investment and Economic Analysis; Land/Timber Acquisition; Logging and Harvest Design, and Logging Supervision; Road Engineering and Layout; Sale of Forest Products; Timber Cruising and Inventory; Trespass Investigation and Damage Appraisal; Utilization and Marketing of Forest Products.

EXPERIENCE

14 years experience as a forester and restoration ecologist. 6 years experience as a low-impact logger. B.S. & M.S. degrees; currently working on a doctorate in forestry with concentrations in forest soils and sustainable forest use and productivity. Memberships in Forest Stewardship Foundation, Forest Stewards Guild, and Society for Ecological Restoration.

SERVICES PROVIDED

Absentee Owner Representation; Aerial Photogrammetry and Interpretation; Disturbance Restoration Services; Entomology and Pathology; Environmental Impact Statements; Erosion; Forest Fire Protection and Assessment Analysis; Forest Management and Silviculture; Forest Resource Potential Analysis; Hydrology; Investment and Economic Analysis; Land Reclamation; Landscaping and Landscape Architecture; Logging and Harvest Design, and Logging Supervision; Nursery Stock Production; Pedology; Prescribed Burning; Rangeland Management; Recreational Development; Reforestation, Seeding, Planting; Sale of Forest Products; Site Preparation; Timber Cruising and Inventory; Timber Stand Improvement; Tree Surgery and Maintenance of Ornamentals; Trespass Investigation and Damage Appraisal; Urban Forestry; Utilization and Marketing of Forest Products; Wildlife Habitat Improvement; Windbreaks and Shelterbelts.

Watershed Consulting bridges the gap between current ecological concepts and on-the-ground forest practices. Our company is different in that we not only provide forest assessments and management plans, we do the work. There is no gap between forester and logger. We specialize in forest restoration, including such goals as sustainable forest use, increasing species and stand structural diversity, increasing tree vigor, decreasing fire hazard, and enhancing wildlife habitat and overall forest health and productivity.
